

IDEAL FOR FLY CONTROL IN FEEDLOTS

USING BIOSWAT WASPS

Control flies in your Feedlot by using Agtegra Cooperative's BioSwat Wasp Control Program. This program will ship BioSwat to enrolled producers every 2 weeks.

WHERE TO USE?

Place Wasps in manure mounds, under bunk lines or wherever flies will lay eggs. BioSwat Wasps are sterile, do not reproduce and cannot fly.

WHEN TO USE?

May through September

HOW MUCH DO I NEED?

1 package per 1,000 head
(recommended to round up on packages)

WHAT'S THE COST?

Price varies depending on quantities purchased:
1-2 packages cost \$31
3+ packages cost \$28

**If you'd like to order, please contact your local Feed Specialist:
OR call the Ipswich Farmstore at 605-426-6772**
