

Body Text

Friday, October 26, 2018 3:45 PM

Built to mimic a WYSIWYG, the box text widget is a rich text editor that allows you to:

- Insert basic text
- Style Text (bold, italicize, underline etc..)
- Add picture
- Hyperlink
- Add a table

And more...

We have also added in some styling features, a user can add some styling to their text:

Add an Outline Box around your text, choosing the color you would like:

We are hosting our largest online tire sale, to-date! We will have specials and promotions on all the top tire brands. Our tire specialists will be giving free tire tracks to make sure your tires are ready for the winter!

Or, Add a Flourish below!

We are hosting our largest online tire sale, to-date! We will have specials and promotions on all the top tire brands. Our tire specialists will be giving free tire tracks to make sure your tires are ready for the winter!

Or a Combination of Both:

We are hosting our largest online tire sale, to-date! We will have specials and promotions on all the top tire brands. Our tire specialists will be giving free tire tracks to make sure your tires are ready for the winter!
