

Logo Header

Friday, October 26, 2018 3:47 PM

Start your email out on the right foot--by introducing your company!
The logo header automatically pulls in the logo used for your website!

Not the logo or version you want to use? Simply select a different one from your media library or upload a new one!

This widget also allows you to configure the orientation of the logo. The default comes in left justified, but you can also select centered, or right justified.
