

Xtend Flex trial notes for DSMs

West Salem WI

8/31/2020

Very Fertile, High yield potential location, High SWM pressure, some SDS, and some lodging

Even some of the current Xtend and Enlist products with strong standability and SWM tolerance were lodged and showing some SWM infection. Very high pressure coupled with strong storms in mid-August lodged site and brought on SWM late.

SXF-12 Trial

- AG09XF0: Average SWM tolerance, below average standability, some SDS noted
- AG15XF1: Below Average SWM tolerance, below average standability
- CP1340XF: Average SWM tolerance, poor standability
- CP1341XF: Average/below average SWM tolerance, poor standability
- CP1441XF: Below average SWM tolerance, poor standability

SXF-16 Trial

- AG15XF1: Below average SWM tolerance, Average standability, some SDS noted
- CP1641XF: Below average SWM tolerance, Stands like a tree
- CP1740XF: Average SWM tolerance, poor standability
- CP1741XF: Above average SWM tolerance, poor standability

SXF-20 Trial

- AG20XF1: Above average SWM tolerance, plant will lean but remains standing
- AG21XF0: Average SWM tolerance, Average standability, Average SDS tolerance
- CP2140XF: Average/below average SWM tolerance, plants will lean but remain standing
- CP2141XF: Above average SWM tolerance, Stands like a tree! "cleanest XF variety in the plot"
- CP2241XF: Average SWM tolerance, plants will lean but remain standing, some SDS noted
