

**108 RM**

# B08C92AML™

**Leader hybrid with top yield potential, solid agronomic package and broad adaptability**

Broadly adapted across most soil types and yield environments.

Enhanced corn earworm and western bean cutworm protection.

Strong Goss's wilt and green snap for the West.

Excellent northern corn leaf blight tolerance.

In areas with high risk to gray leaf spot, a fungicide application may maximize yield potential.

IMPORTANT: Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by Brevant seeds.

Information and scores are assigned by Brevant Seeds and are based on period-of-years testing through 2019 harvest and were the latest available at time of printing. Some scores may change after 2020 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.
