

# B01Z88AM™

101 RM

Top yield potential with wide adaptability across the Corn Belt.

Trait versions with same base  
**B01Z88Q™**

Good stress emergence for cool, wet soil conditions.

Good drought stress tolerance allows planting across most environments.

Strong tolerance to Goss's wilt for areas of high risk.

Solid choice where green snap is a concern.

A fungicide is recommended in areas with heavy gray leaf spot or northern corn leaf blight.

IMPORTANT: Characteristic scores provide key information useful in selecting and managing products in your area. Information and ratings are based on comparisons with other products sold by Brevant seeds.

Information and scores are assigned by Brevant Seeds and are based on period-of-years testing through 2019 harvest and were the latest available at time of printing. Some scores may change after 2020 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision.
