Stop at the grain probe – push a button on the speaker to speak to the office. Please tell them who the load is for and what you would like to do (sell cash, store, hold, or contract). A green light on the corner of the office will indicate that you may pull ahead onto the scale. A buzzer will sound when you have been weighed – exit the scale and turn left onto the gravel drive towards the warehouse building. Turn right at the warehouse and line up next to the building. Please wait there until an employee directs you when to proceed to the dump pits. When the truck is empty, proceed onto the scale and retrieve your scale ticket from the box on the scale. Please verify that your scale ticket is correct before leaving the elevator location. Exit the elevator driveway left (south) on Stanton Street.
